

NATUR I

handcrafted sand pools

www.NaturiPools.com

Artisan Crafted.

Italian quartz sand shaped by hand into unique beach-entries, steps and benches; therapeutic air & water massage delivered through the sand by a patented delivery system; artfully sculpted edging that blends seamlessly with the surrounding landscape.

Relaxed Luxury.

From intimate family retreats to resort level entertainment; Naturi transforms ordinary spaces into extraordinary escapes that are easy to maintain, healthier to swim in, and stunning to behold.

Premium Quality.

01 | Two Part Resins

Resins scientifically formulated to withstand harsh climates and chemical environments.

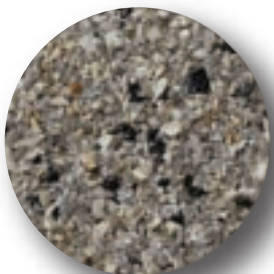

Precisely weighed quantities of aggregate and two-part resins blended on site to ensure the strength and durability of your pool both during and after construction.

High-temperature spa? Sub-zero winters? Saharan desert summers? No problem.

02 | Versatility

No two pools are exactly the same; the design is all about what works for you and your space. Curves or straight lines; gently sloping entry points or vertical walls; steps or wheelchair accessible ramps. Your pool should be built for YOU.

Customization is key, without the additional costs that can come with modifications on other types of pool structures.

03 | Water Circulation, Maintenance & Aerotherapy

A proprietary, patented water delivery system allows water to circulate throughout every inch of the pool, and not just the visible parts. Water is moving throughout the sand surface of the pool as well, working like an in-floor cleaning system in conjunction with the filtration system chosen by your Naturi Certified Artisan to help maintain crystal clear water.

Heated pool? Those same water circulation features that help maintain water quality also add to the efficiency of your heating system -- the heated water returns through the floor and walls of the pool and rises through the water column for minimal heat loss through the surface area.

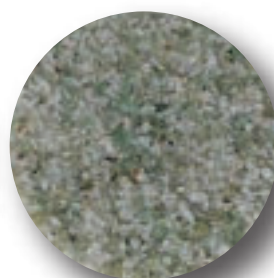

Aerotherapy options round out some of the customizable features that ensure that your experience in your backyard oasis is enjoyable, therapeutic, and beautiful.
